## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-29, drawn to a terminal for simultaneously operating in a first mobile radio communications network and a second different radio communications network comprising first and second transceiver means with various features.

Group II, claim(s) 30-32, drawn to a radio communications system with slots of particular duration.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is the ability of a terminal to operate in two different radio communications systems. The special technical feature of Group II is a radio communications system that has time slots of equal and programmable durations.

Art Unit: 2665

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
